Appendix 1 Guidance on risk assessment

A risk assessment is a careful examination of what in your work or activities could cause harm to people, so that you can weigh up whether you have taken enough precautions or should do more to prevent harm. The law does not expect you to eliminate all risk, but you are required to protect people 'so far as is reasonably practicable'.

When thinking about your risk assessment, remember:

- a hazard is anything that may cause harm, such as trailing or bare electric cables, unrestrained windows on upper floors, shared fabric towels in washrooms and unlocked cupboards containing chemicals and / or cleaning fluids
- the risk is the chance, high or low, that somebody could be harmed by these and other hazards, together with an indication of how serious the harm could be.

Step 1: Identify the hazards

First you need to work out how people could be harmed.

Step 2: Decide who might be harmed and how

Identify groups of people who might be harmed and how they might be harmed, which includes employees, volunteers and helpers, pupils, visitors and contractors.

Step 3: Evaluate the risks and decide on precautions

Decide what to do about the risks. Compare what you currently do with what is accepted as good practice. If there is a difference, list what needs to be done.

When controlling risks, apply these principles, if possible in this order:

- try a less risky option
- prevent access to the hazard
- organise work to reduce exposure to the hazard
- issue personal protective equipment
- provide welfare facilities

Step 4: Record your findings and implement them

If you employ five or more people, the law requires you to record your findings. You can use the attached template or download a template from <http://www.hse.gov.uk/risk/casestudies/>.

A health and safety checklist for classrooms can be downloaded from <http://www.hse.gov.uk/risk/classroom-checklist.htm>.

Step 5: Review your risk assessment and update if necessary

You should review what you are doing on a regular ongoing basis.

Appendix 2 Specific Arrangements at the School

Appendix 4 Guidance on RIDDOR reporting

The School is obliged to report certain accidents, diseases and dangerous occurrences or near misses under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (SI 2013/1471) (**RIDDOR**):

Accidents involving staff

The School will report:

- work-related accidents resulting in death or 'specified' injury (including as a result of physical violence) must be reported immediately (major injury examples include: any loss of consciousness caused by head injury or asphyxia; amputation)
- work-related accidents which prevent the injured person from continuing with his / her normal work for more than seven days.
- certain work-related diseases
- certain dangerous occurrences or near misses (reportable examples: bursting of closed pipes; electrical short circuit causing fire; accidental release of any substance that may cause injury to health).

Accidents involving pupils or visitors

The School will report accidents where the pupil or visitor is killed or is taken from the scene of the accident to hospital and where the accident arises out of or in connection with a "work activity".

In determining whether the accident arose out of a "work activity", the School should consider whether the accident was caused by factors, such as:

- a failure in the way a work activity was organised e.g. inadequate supervision on an educational visit
- the way in which equipment, machinery or substances were used
- the condition, design or maintenance of the School premises.

Further guidance can be found in *Incident reporting in schools (accidents, diseases and dangerous occurrences): guidance for employers* (EDIS1 (revision 3)), and at <http://www.hse.gov.uk/riddor/resources.htm>.
